

Applied Spectral Imaging - Quality Policy

Quality Service is in Our Genes

Applied Spectral Imaging's Quality Policy is to provide our customers with the highest quality products and services.

ASI and its' employees adhere to strict guideline and procedures ensuring compliance with regulatory, legislative and quality standards. ASI strives to incorporate transparency, auditability and viability in everything it does making sure customer's needs are met in full.

Applied Spectral Imaging commits and empowers its employees to implement this policy through the following course of actions:

- Make customers' total experience with Applied Spectral Imaging the best in the industry
- Clearly understand customer needs and provide reliable products, continuous support and training to meet these needs
- Integrate quality management practices into business processes at critical decision-making junctions
- Continuously improve the effectiveness of ASI's quality management system, processes, practices and products, enhancing, at all times, customers, shareholders, and employee value
- Establish quality standards for suppliers, partners and contractors, expecting and inspecting these standards to ensure compliance
- Maintain a quality management system to conform to the requirements of ISO 13485
- Comply with all applicable regulatory requirements
